Analyzing IQ Records Using Graphs
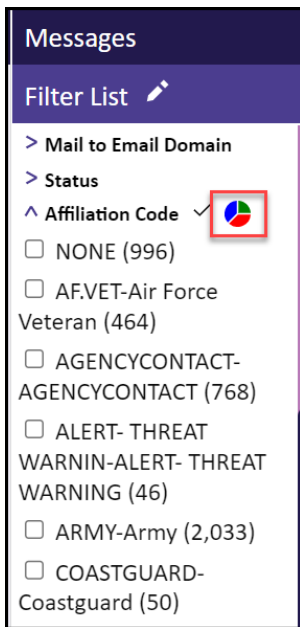

Market: House, Senate

Description: In additional to viewing records as a list, you can view records via graphs for identification and analysis.

1. Navigate to the set of records that you want to analyze. In this example, we are using **Messages → My Messages** view **→ Open Unbatched**

2. Click the and filter the data as needed.

3. Once a filter is selected, the list of options will expand and this will display. Click .

4. The Analyze List window opens and you can:
    a. Select additional filtering options by using the drop down
    b. Choose to view the data as a pie chart or bar graph.
    c. Open the sorted records by clicking into the color groupings within the graph or key
    d. Print
