

## Merging Duplicate Contact Records in IQ5

**Market:** House, Senate

**Description:** These instructions teach users how to merge duplicate contact records.

### ***Merging Duplicate Records***

1. Navigate to the **Contacts** application and select a **View** to search from. When looking for Duplicates, it's recommended to search using one of the **Views** in the **Directory** such as **All Contacts**. Enter the name of the contact in the search bar.
2. If duplicates are found, **check the boxes** next to each duplicate you would like to Merge. Then **Click Change → Merge Contacts**.

3. IQ displays the **Manual Merge** dialogue. Choose the **Target** contact record (which will be the Contact that all the others will be merged into) and click **Merge Contacts**.

#### 4. The Contacts are now **Merged**.

**Note:** You may need to “clean up” the merged contact record as any address/contact information from the other records will stack on what already exists. Therefore, you will want to delete repeated addresses, emails, etc.
